

Acewell ACE-MA85-X54W Version : A

This document shall help with the connecting. Technically it can be dated to 16. February 2017. Please check the wire colors before connecting. With the multitude of speedometers available on the market, it is impossible for me to keep all connection plans up-to-date. If you notice any errors, please let me know. Thank You.

Wheel circumference: depending on the tire approx. 1950mm

Impulse pro revolution of the wheel: 6

Tank sensor: 0ohm = empty, 100ohm = full, at 10ohm the reserve light is disengaged

BAR: **only one wire!** Grey (connector A) reserve LED **or** Blue (connector B) barograph display
